

BLACKWATER

ENVIRONMENTAL GROUP

DEVELOPING UNIQUE SOLUTIONS TO STREAMLINE THE ENVIRONMENTAL AND REGULATORY PROCESS

Blackwater strives to remember the original intent of national environmental policy -- environmental protection, conservation, and enhancement -- with every project and seeks innovative ways to streamline the ever-changing regulatory process.

Blackwater staff have over 20 years of experience working with governmental agencies, especially in the transportation industry, interpreting environmental policy and developing unique solutions to daunting project coordination and environmental documentation tasks. Blackwater staff have worked for federal and state agencies as well as private engineering companies and, therefore, bring a distinct and balanced perspective to the table.
